Forecast for Thursday 28 Sep 2023

Weather: Gale, near Storm force winds continuing overnight, though slowly easing. Mostly cloudy conditions expected along with some occasional drizzle, mainly on western slopes. Mainly dry and bright in the daytime, with winds easing a little through the middle of the day, but still remaining fairly strong. Turning cloudier during the late afternoon and evening, with a risk for a more persistent and widespread period of rain to develop in the evening. This could be heavy and accompanied by strengthening winds on summits.

Chance of cloud-free hill tops above 600m: 80%, but falling to 60% during the evening.

Low Cloud and visibility: Cloud generally above summits through the morning, but a few patches of cloud possible on the highest summits at first. A chance for more widespread low cloud to develop during the evening with extensive bases 400-500m and patches below this. Visibility generally very good, but becoming moderate or poor if persistent rain develops.

Meteorologist's View

Winds on summits may exceed those indicated in the tables above, especially into the evening, perhaps approaching gusts of 35-40mph. Walking conditions are expected to be tricky given strong winds, particularly early and late in the day. A risk of heavy, persistent rain into the evening would bring poor visibility and disorientating conditions as cloud thickens.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:

Forecast for Friday 29 Sep 2023

Weather: Rain clearing overnight with winds easing a little, though probably still mostly cloudy around dawn. Early cloud soon clearing to leave a generally dry and bright but breezy day. Just a small chance of the odd, blustery afternoon shower developing inland. Fine through the evening.

Maximum wind: Westerly 20-25mph, gusting 35mph.

Chance of cloud-free hill tops above 600m: 80%.

Low Cloud and visibility: A few patches of cloud may cover high western hills through the early morning, otherwise fine. Visibility will be good or very good.

Temperature: **Valleys:** Plus 11 increasing Plus 16 degrees Celsius.
At 600m: Plus 10 degrees Celsius.
Freezing level: Above summits.
